Drawings

The corrected or substitute drawings were received on January 3, 2002. These drawings are acceptable.

Allowable Subject Matter

Claims 1-6 are allowed.

The following is an examiner's statement of reasons for allowance:

The primary reason for the indication of the allowability of claims 1-6 is the inclusion therein of the combination of "a hollow elongated conductive enclosure" and "a flexible electrical conductor having an exposed electrically conductive surface within the enclosure making electrical contact with the enclosure interior in a plurality of randomly distributed regions along the length of the enclosure" in combination with the other claim limitations. This combination was neither disclosed nor taught by the prior art, alone or in combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

Applicant's arguments filed January 3, 2002 have been fully considered and they are persuasive. The arguments starting on page 3, where emphasis is made of what is

being recited in claim 1, mainly a hollow elongated conductive enclosure;... and a flexible electrical conductor having an exposed electrically conductive surface within the enclosure making electrical contact with the enclosure interior in a plurality of randomly distributed regions along the length of the enclosure. The Applicant continues with an explanation as to why the prior ^{art} does not disclose or teach, alone or in combination, the PR 5/4/02 claim limitation as above mentioned with emphasis along with the other claim limitations.
